The Ford EEC or Electronic Engine Control is a series of ECU (or Engine Control Unit) that was designed and built by Ford Motor Company. The first system, EEC I, used processors and components developed by Toshiba in 1973. It began production in 1974, and went into mass production in 1975. It subsequently went through several model iterations.

Ford Focus Car ECUs & Computers | eBay

Electronic Stability Control (ESC) incorporates a range of technologies designed to give you greater control of your vehicle and help keep you safe. For example, sensors constantly monitor the speed of each individual wheel, the car's 'yaw rate' (its angle and direction) and steering angle. If you have to steer sharply left or right, perhaps to avoid an obstacle, ESC precisely balances braking power between each individual wheel and can also reduce power from the engine.

Electronic Stability Control - Ford Technology | Ford UK

by Zyon Silket Ford did a good job of hiding the ECM (electronic control module) on the Ford focus. Many Ford vehicles have the ECM mounted inside the engine bay, and some older models have the ECM mounted behind the kick panel, on the passenger side of the vehicle. With the Focus, Ford has found a new location: behind the glove box.
